PROFESSIONAL SUMMARY

Front-End Engineer with 6 years of experience architecting, building, and scaling high-performance, responsive web applications for large educational and technology-driven organizations. Comfortable moving between modern (React, Next.js, TypeScript) and legacy (JavaScript, jQuery) stacks depending on project needs — a versatility well suited to multi-client consulting environments. Solid track record in REST API integration within distributed architectures, advanced component-based design, and automated quality assurance (Jest, React Testing Library). Experienced collaborating with international, cross-functional stakeholders and delivering within Agile/Scrum frameworks. Strong advocate for UI/UX best practices, WCAG 2.1 accessibility, and continuous improvement. Two-time Global Nominee at the NASA Space Apps Challenge (2024 & 2025), presenting innovative 3D web applications to international judging panels.

CORE COMPETENCIES

- **Front-End Development:** React, Next.js, JavaScript ES6+, TypeScript, Vue.js, HTML5, CSS3, Sass, Tailwind CSS, jQuery, Bootstrap, Styled-Components, GraphQL, Micro Frontends, Single-SPA;
- **Back-End & Integration:** Java, .NET, C#, Node.js, Python REST API design & integration, distributed architectures;
- **Architecture:** Automated Testing (Jest, React Testing Library), Component-Based Architecture, Responsive & Mobile-First Design, Web Performance Optimization, WCAG 2.1 Accessibility, UI/UX Principles;
- **Tools:** Git, GitHub, Webpack, Docker, Vite, Azure, CI/CD, OpenShift, Figma, Jira, Google Analytics;
- **Databases:** MySQL, Redis;
- **IA:** LLMs, AI Agents, Multi-Agent Systems, VPS AI Infrastructure, AI SDKs, Prompt Engineering, RAG, MCP;
- **Blockchain:** Ethereum, Solana, Solidity;
- **Ways of Working:** Agile/Scrum & Kanban methodologies, cross-functional & international stakeholder collaboration, fast learning curve, adaptability across legacy and modern tech stacks.

PROFESSIONAL EXPERIENCE

Front-End Engineer II — SENAI CIMATEC, Salvador, BA, Brazil

Aug 2023 – Present

- Engineered and maintained scalable component libraries and standardized workflows spanning both modern (React, Next.js, TypeScript) and legacy (JavaScript, jQuery) front-end stacks, adapting the technical approach to each project's constraints and measurably accelerating delivery speed across concurrent educational and technology initiatives.
- Architected scalable web solutions that increased engineering productivity by 10x through reusable components and standardized development workflows, reactive user interfaces with JavaScript, HTML5, CSS3, and Tailwind CSS, with a rigorous focus on page load performance and full compliance with WCAG 2.1 accessibility standards.
- Led the integration of front-end applications with REST APIs and third-party services within distributed architectures, ensuring secure, reliable data communication across multiple production systems.
- Partnered directly with UI/UX designers, back-end engineers, and business stakeholders in Scrum ceremonies, translating high-fidelity Figma prototypes into pixel-accurate, production-ready interfaces.
- Contributed to code quality and technical consistency through regular peer code reviews, reinforcing coding standards across both React/Next.js and legacy JavaScript codebases.

- Championed automated testing practices (Jest, React Testing Library), reducing regression defects and strengthening release confidence in CI/CD pipelines.

Front-End Engineer I — *SENAI CIMATEC, Salvador, BA, Brazil*

Jul 2022 – Apr 2023

- Developed, maintained, and evolved 170+ institutional websites and e-learning platforms, ensuring consistent performance and reliability for a large, multi-stakeholder user base.
- Implemented fully responsive interfaces following Mobile-First principles using HTML5, CSS3, JavaScript, jQuery, and Bootstrap, delivering consistent usability across desktop and mobile devices.
- Optimized front-end performance (load time and rendering) and guaranteed cross-browser compatibility across desktop and mobile platforms.
- Partnered directly with UI/UX designers, back-end engineers, and business stakeholders in Scrum ceremonies, translating high-fidelity Figma prototypes into pixel-accurate, production-ready interfaces.

Full Stack Freelance Developer — *Brazil*

Jul 2020 – May 2022

- Develop modern web applications using JavaScript, React, C#, TypeScript, Node.js and Figma.
- Build high-quality, responsive user interfaces with strong focus on UI/UX, performance, and scalability;
- Create interactive and visually engaging web experiences, including 3D interfaces using Three.js.

EDUCATION

Bachelor's Degree in Computer Science — *Ruy Barbosa College*

Graduated: Dec 2022

- Final Project (TCC): Designed and implemented a blockchain-based smart contract system using Solidity for decentralized data management in public institutions — Final Grade: 10/10 (Highest Distinction).

KEY PROJECTS

NASA Space Apps Challenge — Two-Time Global Nominee (2024 & 2025)

- **Impacts — Asteroid Impact Visualization Platform**
 - Built an interactive 3D web platform simulating trajectory and impact scenarios for a hypothetical near-Earth asteroid, turning complex astronomical/scientific data into a narrative-driven, accessible user experience for a general audience [JavaScript/Three.js].
- **GlobeExplorers — AI-Powered Environmental Education Game**
 - Co-developed a 3D educational game applying NASA's GLOBE Program protocols, integrating a YOLO computer-vision model for real-time marine debris detection and live environmental data pulled from the GLOBE API [JavaScript/Figma/C#].

CERTIFICATIONS & COURSES

- Introduction to OpenShift Applications DO101 - Red Hat (10 hours)
- Red Hat OpenShift I: Containers & Kubernetes DO180 - Red Hat (12 hours)
- Next.js & React – The Complete Guide – Udemy (40 hours)
- Understanding TypeScript Udemy (15 hours)
- Figma UI/UX Design Essentials (12 hours)
- Technical course in electrotechnics (1200 hours)

LANGUAGES

- Portuguese — Native | English — B2 (Upper-Intermediate);
